NWHCM : 1979.463.2	film	Film in metal container with red and white label; Kodak Nitrate Film 4M 20040 / 7U 00995; first frame shows two men in nightshirts; 1930s		Nitrate film is difficult to store. NMS do not have the capability of legally storing nitrate film. This film was stored with the East Anglian Film Archive, they are no longer able to store the film for us, and neither are the Norfolk Record Office. The film is currently being stored by the BFI. Having viewed the film the BFI have declined the opportunity to acquire the film as it either duplicates what they already have or is unidentified. John Oliver from the BFI advised us that "another organisation who would wish to acquire those reels of film does not come readily to mind, as few places can legally store nitrate, in addition to the fact that the reels are just very small fragments from some unidentified features or shorts." The BFI are happy to safely dispose of the film for us providing we secure approval. Kett, Wayne 14.12.2016	Disposal. BFI to safely dispose of this object.
