

## Our Vision

To provide every patient  
with the care we want  
for those we love the most

Item 7 Appendix B

Norfolk and Norwich University Hospitals

NHS Foundation Trust

# Presentation to the Norfolk Health Overview and Scrutiny Committee

6<sup>th</sup> December 2018

Our Values **P**eople focused **R**espect **I**ntegrity **D**edication **E**xcellence

**Our Vision**  
To provide every patient  
with the care we want  
for those we love the most

## Five Year QI Vision

**Y0**  
2018

**Y1**  
2019

**Y2**  
2020

**Y3**  
2021

**Y4**  
2022

**CQC  
rating**

**Special Measures**

Focus: 'must/should do' actions

**Getting to 'GOOD'**

Transforming services

**Journey to OUTSTANDING**

Becoming the best & leading the way

**Change  
vehicle**

**Project Management**

Transactional; compliance led

**Deliver QI Strategy led by QI Director**

Transformational; vision led

**Strategic  
goals**

**We will be:**

- A provider of high quality healthcare to our local population
- The centre for complex & specialist medicine for Norfolk & the Anglia region
- A recognised centre for excellence in research, education and innovation
- A leader in the redesign & delivery of health & social care services in Norfolk

Set goals  
for next  
five years

**QI  
journey**

- Strategic Intent for QI
- Leadership for QI
  - Building improvement skills
  - Building a culture of improvement
  - Putting patients at the centre of QI
  - Applying systems thinking in QI

Delivering outstanding:  
 ♦ Efficiency ♦ Engagement ♦ Experience ♦ Improvement

## CQC Domains

All 82 of the CQC 'must do' and 'should do' recommendations have been assigned to one of the five CQC domains:

## Outcome statements

All 82 of the ‘must do’ and ‘should do’ recommendations has an ‘outcome statement that can be articulated in the format: **“We will have achieved GOOD when....”**

*E.g. Recommendation 4a: The trust must ensure that there is an effective process for quality improvement and risk management in all departments.*

### **We will have achieved GOOD when:**

- We have a Trust Wide QI Strategy with an implementation plan in place, communicated to all staff
- A QI faculty is in place to provide support & facilitation to teams to deliver QI projects
- A Central record of QI projects mapped to department / division & strategic objectives is available and maintained
- A reporting system is in place and being utilised by teams to clearly demonstrate improvements

## Evidence Repository

Our approach is rigorously evidence based. We will only categorise a recommendation as ‘complete’ when there is clear documentary evidence filed in the central evidence repository that the outcome statement has been sustainably achieved.

We have established a two-stage assurance process to independently evaluate the evidence:

- **Stage 1** evaluation is carried out by the Improvement Team
- **Stage 2** evaluation is carried out by the Evidence Group, which comprises internal and external assessors, including 3 staff members and a patient representative.

The Quality Programme Board is the only body that can ‘sign off’ a recommendation as being ‘complete and evidenced’.

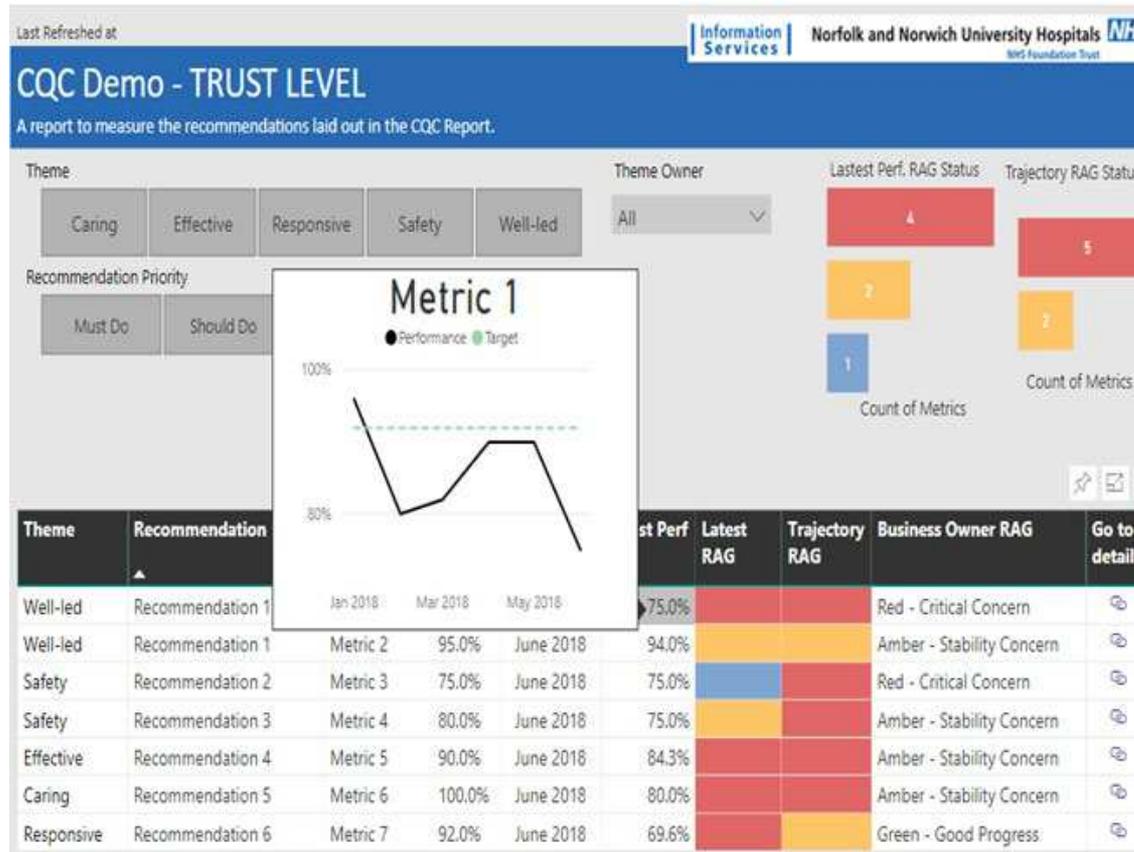

## Monthly reporting

Each month a highlight report is produced for each of the 82 recommendations. These reports are discussed at the internal Quality Programme Board and the external Oversight Assurance Group.

A performance dashboard has also been created. Screenshots from the dashboard are shown on the following two slides:

# NOVEMBER 2018 ASSURANCE

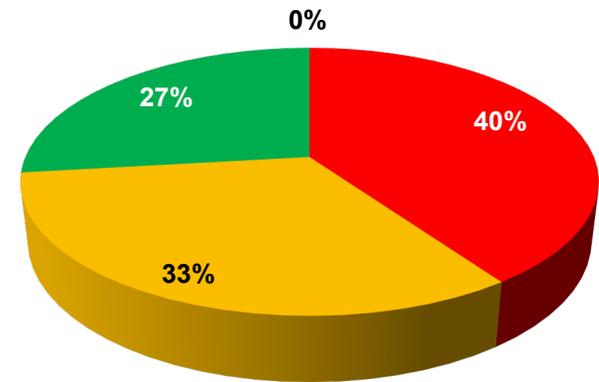

## All work streams

**ASSURANCE - all work streams**  
November QPB

■ Red ■ Amber ■ Green ■ Blue

**ASSURANCE - all work streams**  
October QPB

■ Red ■ Amber ■ Green ■ Blue

Overall RAG Rating			
Overdue or not on track	At risk of delivery	On Track	Complete & evidenced

## Our Vision

To provide every patient with the care we want for those we love the most

## Quality and Safety Improvement Strategy

### “Supporting our Journey to Outstanding”

Our quality and safety improvement strategy describes our strategic intent for QI and sets an ambition to build a culture of improvement at all levels.

- Our patients will be at the centre of QI and will be involved as true and equal partners
- We will build the capacity and capability for quality improvement so that everyone from the Board to the frontline has the ability to contribute.
- Our staff will feel empowered to be creative and innovative, always looking for ways to improve their services and the care provided.
- Our leaders create the conditions and commitment to QI and shared across the organisation
- We will see improved patient experience and patient safety metrics
- The focus on quality first will be a consistent part of our culture, from ward to Board.

Fig2: Quality Improvement in Hospital Trusts CQC Sept 2018

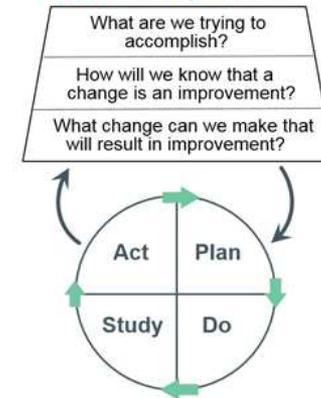

## QI Faculty

### *Building capacity and capability for improvement*

We will build improvement skills in the following key areas:

- QI methodology and tools
- Human Factors
- Patient and Public Involvement in QI.
- Safety Culture

Model for Improvement

We will strengthen our approach to recognising and sharing quality by building a network of staff throughout the organisation based on the Health Foundation's Q initiative.

'Q' aims to connect people with improvement expertise across the UK, fostering continuous sustainable improvement in health and care.

We will use the **Life QI** electronic platform to help create and deliver improvement projects at every level and in every setting. It is a simple system to access, provides overview of all QI activity and encourages sharing of learning.

## Capacity - Winter 2018/19

- Based upon learning from prior year and National best practice guidance and developed in conjunction with the wider Norfolk system
- 3 themes overarching an '8-Point Plan'
- Delivery risks mitigated by assuming a 'belt and braces', planned over-provision set of solutions

### Capacity

- Additional beds – Modular Ward Facility plus all beds open (CDU, Gastro, Cringleford, Earsham & Denton)
- Creating a discharge suite to free up ward space earlier in the day
- Additional ED cubicles to eliminate ambulance congestion and delay
- Open an 'NNUH @ Home' Virtual Ward for sub-acute patients
- Extend OPED Opening hours

### Leadership

- Senior Nurse, Doctor and Manager to 'Project Manage' winter plus seconded support / senior EEAST staff member to the NNUH Winter Team

### Process

- Reduce the length of stay for 'Super Stranded' patients (over 21-days in hospital) in accordance with latest national guidance
- Focus clinical & operational processes relating to discharge earlier in the day

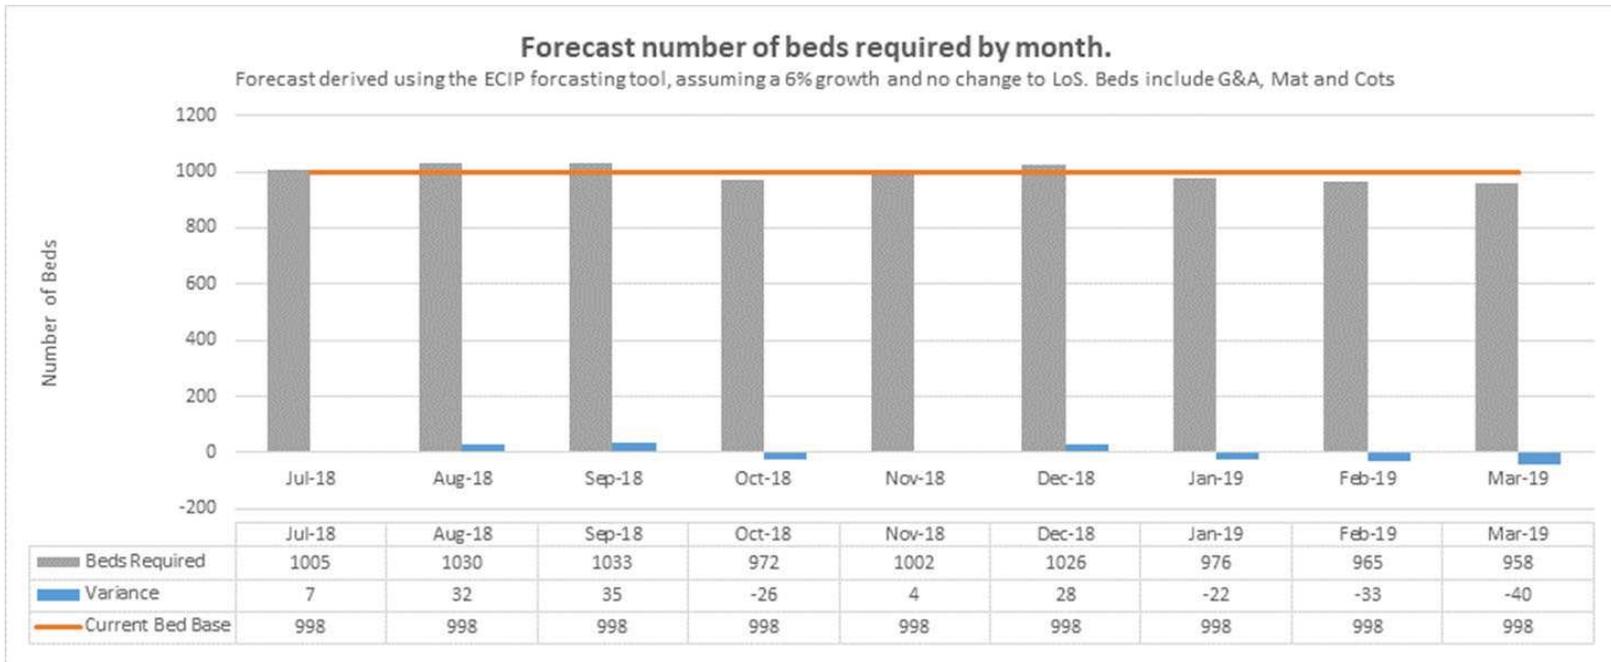

**Our Vision**  
To provide every patient  
with the care we want  
for those we love the most

Capacity

## • No. 1 - Additional beds

- Bed capacity requirement modelled using recognised tool
- Relative worst-case scenario used – assumes **6% growth on 2017/18 & no improvements in length of stay and 92% occupancy**
- 22 – 40 additional beds required

Capacity

## • No 1 - Additional beds cont'd

- Working assumption is to 'over-deliver' against the 40 - bed scenario on the basis that 92% occupancy is relatively high and the experience in Q1 has been of significant non-elective pressure, over and above contract plan levels.

Schemes in progress are:

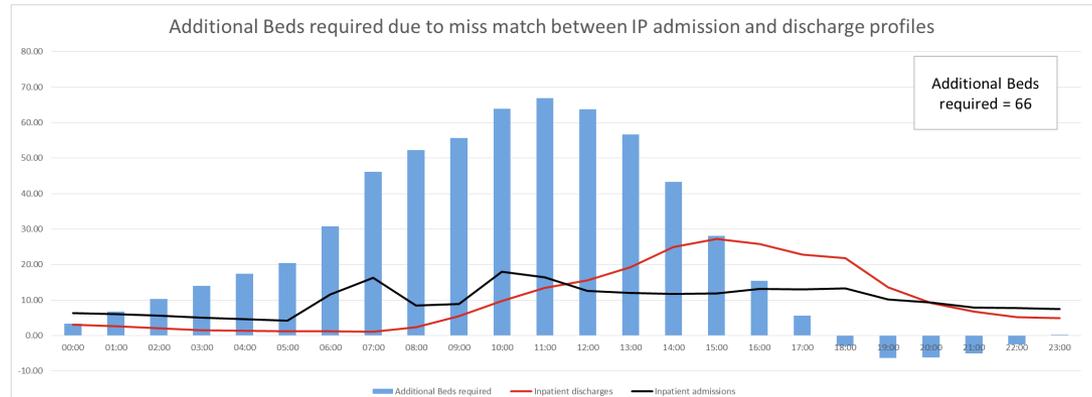

Scheme	Timescale (& indicative cost)	Beds
<b>Temporary Modular Ward</b> – Installation underway	Target date – December 2018	12 elective
<b>Opening Existing Escalation space</b> – Opening and establishing currently closed & / or beds being used for research / non-clinical space across medicine and surgery	Target w/c 24 September 2018. Recruitment commenced. (£505k revenue – recovery through activity over-performance).	45
	<b>Total</b>	<b>57</b>

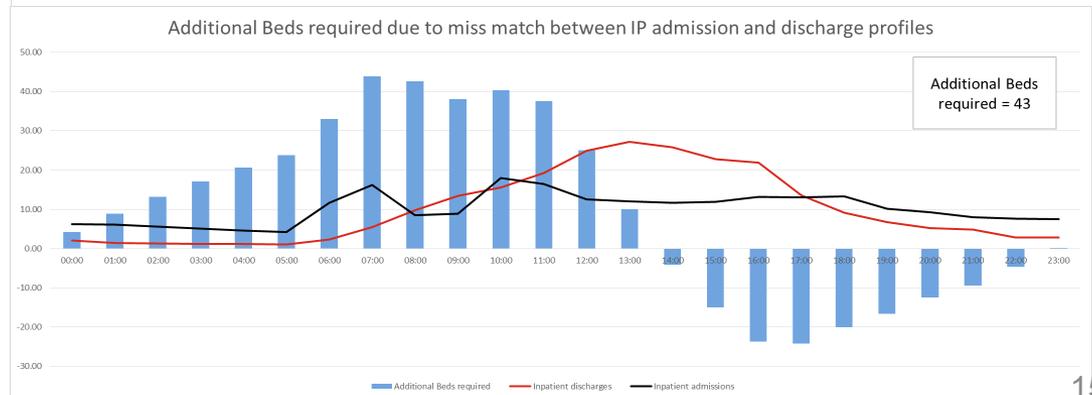

## • No. 2 – Discharge Suite

- Review of the time-of-day of discharges suggests a 'late-profile' drives the use of overnight escalation
- **Delivering 30% of discharges by 12md offers the opportunity to reduce the admission / demand mismatch by circa 23 beds**

### Current Discharge Time Profile

**Discharge Time Profile brought forward by 2-hrs (=30% by midday)**

## Our Vision

To provide every patient  
with the care we want  
for those we love the most

## Capacity

### • No. 2 – Discharge Facility

- Task & Finish group well-established – overseen by Senior Ops and Nursing & includes patient co-design
- Space for 20 seated patients plus 8 bed / stretch patients awaiting ambulance transport
- On track for **Mid December 2018**

## Capacity

### • No. 3 – Additional ED cubicles

- Plans are in place to expand the Rapid Assessment and Treatment area to 8 spaces, allowing a maximum ambulance off-load capacity of 32-patients / hour
- Capital costs (circa £1.2m) funded by NHSE
- On track for **14 December 2018**

## Our Vision

To provide every patient  
with the care we want  
for those we love the most

## Capacity

### • No. 4 – Virtual Ward Trial ‘NNUH @ Home’

- 3<sup>rd</sup> Party Provider engaged to establish a **30-bed** virtual ward for patients living in a 15-mile radius of NNUH
- 9-month Trial would allow NNUH and system partners to assess what a sustainable model could look like in future – either to be run in house or in partnership
- Principle is that patients requiring sub-acute care but occupying a bed e.g. long term antibiotic therapy, complex wound dressings, multiple insulin dose administration etc. would remain the responsibility of their NNUH consultant but would receive this care at home
- This is a relatively common model across the NHS.
- The pilot has a 12-week mobilisation timescale

## Capacity

### • No. 5 – OPED extension

- OPED opened in December 2017 and despite a challenging winter fewer patients over 80yrs of age were admitted to NNUH
- The service currently runs until 5pm. This scheme looks to extend it until 8pm weekdays and at the weekend linked to demand
- Recruitment of staff has commenced

# Winter Plan Summary

Scheme		Gain	Bed No's
Capacity	1. Additional Beds	<ul style="list-style-type: none"> <li>Modular ward for use as escalation at times of peak pressure</li> <li>Establishing and opening all / any closed areas (Inc. Gastro)</li> <li>Specifically to limit or eliminate the use of Day Procedure areas for in-patients</li> </ul>	57
	2. Discharge Suite	<ul style="list-style-type: none"> <li>Earlier flow to limit out-of-hours escalation</li> </ul>	23 *
	3. Additional ED cubicles	<ul style="list-style-type: none"> <li>Additional 8 spaces focussed on Rapid Assessment &amp; Treatment (RATS)</li> <li>Designed to cope with high and variable ambulance arrivals</li> </ul>	0
	4. NNUH @ Home	<ul style="list-style-type: none"> <li>Virtual Ward to care for patients at home with sub-acute clinical needs</li> </ul>	30
	5. OPED hours increase	<ul style="list-style-type: none"> <li>Enhances the delivery of a known and effective service</li> <li>7-day working, 12-hrs per day</li> </ul>	0
Leadership	6. Winter Team	<ul style="list-style-type: none"> <li>Enhanced capacity to deliver all other associated Winter Schemes</li> <li>Additional capacity to oversee day-to-day performance during winter</li> <li>Link to system and national structures</li> </ul>	0
Process	7. Super - Stranded	<ul style="list-style-type: none"> <li>Delivery of a suite of actions to comply with the national initiative to reduce super-stranded numbers</li> </ul>	23*
	8. Early Discharge processes	<ul style="list-style-type: none"> <li>Improve systems and processes to support the discharge lounge and reduce out-of-hours escalation</li> </ul>	(supports No. 2)
<b>Totals</b>			<b>133</b> (Actual 87 + 46* Transformational)

## Medium term investment in capacity

Current agreed NNUH schemes include:

- PET CT – opens March 2019
- Quadram Institute – opens December 2018
- IRU & 4<sup>th</sup> Cathlab – opens November 2019
- Cromer Development – opens summer 2020

Current NNUH schemes in development:

- Diagnostic and Assessment Centre - part of a £69m STP priority capital bid with JPUH and the QE hospitals
- Turnstone court – development of two daycase theatres at Norwich Community Hospital
- Renal Dialysis to be provided in the community (with car parking)
- Multi-storey Car Park (charitable funded)
- Nuclear Medicine (£2m) – expansion of key cancer service
- Breast Imaging expansion – to enhance one stop clinics for suspected cancers
